- **Step 1:** Draw a rough layout of the room on the form. Include outlines and locations of all permanent fixtures such as bathtubs, toilets, vanities, cabinets, floor vents, floor outlets and appliances.
- **Step 2:** Add accurate room measurements, and dimensions of permanent fixtures.
- **Step 3:** Mark preferred thermostat location. Ideally a location within easy reach of an existing power supply.
- **Step 4:** Calculate the square footage of the area to be tiled and choose membrane(s) size accordingly from the Prodeso Membrane Table below.
- **Step 5:** Calculate the square footage of the area to be heated and always choose heating cable(s) length that cover slightly less than the open space to be heated. Use TempZone Cable Tables below. When between the sizes choose the shorter cable.

Job Name: _____ **Room Type:** _____ **Scale: 1 Box = ___ ft**
