Sierra Towel Warmer Series

Dual Connection 120 VAC

The Sierra Towel Warmer offers a luxurious and practical addition to any bathroom, blending a bold, modern design with powerful performance. With options for polished stainless steel, matte black, and polished gold finishes, and flexible dual connection for plug-in or hardwired installation, you can customize your experience to perfectly match your home's aesthetic and your personal needs.

THREE FINISHES

Polished Stainless Steel

Matte Black Stainless Steel

Polished Gold Stainless Steel

From the warmth of eight square bars to the innovative TempSmart protection and a range of smart control options, every detail is crafted for your comfort and convenience. Installation is straightforward, ensuring you can quickly enjoy the simple pleasure of a warm towel.

PRODUCT FEATURES

Features

The Sierra Towel Warmer blends cutting-edge technology with a striking, geometric aesthetic to redefine your bathroom's design. Every element—from its sharp, square-bar profile to its advanced heating efficiency—is engineered to deliver superior performance and safety, bringing a bold touch of modern architectural luxury to your daily routine.

Modern Geometric Design

Make a bold statement. The Sierra features 8 sleek, square bars with sharp, linear angles, offering a highly modern, architectural aesthetic that perfectly complements contemporary bathroom fixtures.

Dual-Connection Versatility

Enjoy ultimate flexibility. Plug the unit into a standard outlet for a quick, DIY setup, or have it professionally hardwired for a clean, cord-free look — both options are supported out of the box.

Seamless Wall-Mount Design

By routing the hardwire connection directly through the mounting bracket and inside the leg, the Sierra eliminates the need for an unsightly wall plate or exposed junction box. This ensures a perfectly flush, minimalist aesthetic.

State-of-the-Art LED Control

Experience modern convenience at your fingertips. The Sierra features a sleek, integrated power switch with a discrete blue LED indicator light. This state-of-the-art design is flush-mounted to maintain the towel warmer's clean, minimalist lines while providing a clear, elegant visual cue when the unit is operating.

TempSmart Safe-Touch Heating

Engineered for family-friendly safety. Built-in TempSmart™ technology automatically regulates the surface temperature, preventing the unit from overheating while maintaining a safe, consistent warmth.

Eco-Friendly Efficiency

Indulge in daily luxury without the high energy bill. Operating at 150 Watts, the Sierra uses about the same electricity as a standard light bulb, costing only pennies a day to run.

Premium PVD Polished Gold Finish

Elevate your space with our ultra-premium Polished Gold model. Utilizing advanced Physical Vapor Deposition (PVD) technology, the gold finish is bonded to the 304-grade stainless steel at a molecular level. This state-of-the-art process delivers a brilliant, rich gold luster with unmatched resistance to scratches, tarnishing, and corrosion, ensuring your towel warmer remains a stunning bathroom centerpiece for years to come.

Hardwired controls are compatible with hardwired installations only. For plug-in installations, contact us for plug-in timer options.

INSTALLATION STEPS | GUIDELINES

4 Simple Steps to Install

Installing the Sierra is as seamless as its modern design. Whether you choose the quick convenience of a plug-in setup or the clean, cord-free look of a professional hardwired installation, these four straightforward steps will have you enjoying architectural warmth in no time.

Choose Your Connection Type

Decide whether you'll use the Sierra as a plug-in unit or have it hardwired by a licensed electrician. For plug-in use, confirm a standard 120 VAC outlet is accessible near the intended mounting location.

Make the Electrical Connection

For plug-in installation, route the 77" cord to the nearest 120 VAC outlet. For a hardwired installation, have a licensed electrician complete the connection — no cover plate is required thanks to the Sierra's unique design.

Mount the Unit to the Wall

Using appropriate wall anchors for your wall type, mount the Sierra securely at a comfortable height. Ensure the unit is level and all mounting points are firmly secured before connecting power.

Power On & Verify Operation

Switch the unit on using the integrated LED power switch. The LED indicator will confirm the unit is active. TempSmart protection is always operational — no additional setup is required.

ORDER INFORMATION

How to Order — It's Easy!

Choose your finish and confirm your installation type — we'll help you find the perfect Sierra for your bathroom! The Sierra Towel Warmer is available in polished stainless steel, matte black, and polished gold, all with full dual-connection capability.

Step 1: Choose Your Finish

Select polished stainless steel (TW-SR08PS-HP), matte black (TW-SR08KS-HP), or polished gold (TW-SR08GS-HP). All three models share the same features and specifications.

Step 2: Plan Your Installation

Decide whether you'll use the Sierra as a plug-in or have it hardwired by a licensed electrician. Confirm your outlet location or arrange for an electrician visit before your unit arrives for the smoothest installation experience.

Step 3: Order & Install

Place your order through your WarmlyYours Dedicated Account Manager. Plug-in installation is straightforward — mount, connect, and switch on. For a hardwired finish, your electrician will complete the connection with no cover plate required.

INSTALLER NOTE: Power connects directly inside the mounting leg. Do not rough-in an electrical junction box at the mounting location.

Questions about which finish or installation type is right for your project? Contact us — we're happy to help you choose the perfect Sierra Towel Warmer for your bathroom.
