

Radiant Luxury. Defined.
The journey to warm feet begins here...

Twin cables provide greater flexibility than traditional cable and mat systems. This enhances the ease of installation in irregular shaped rooms with angled or rounded walls and in tight spaces with obtrusive plumbing or support structures. This is a perfect alternative option for installers who prefer the flexibility and freedom of working with loose cable.

- Ideal for in-field flexibility
- Full heating coverage for spaces of any shape or size
- 120V or 240V
- 10-12 watts per sq. ft. at 3" spacing

Your solution is inside the box:

- TempZone™ Cable Twin
- SmartStat Programmable Thermostat
- Circuit Check
- Cable Strips
- Installation Manual
