

Barcelona

with WeMo Switch

Grabbing a plush, warm towel as you step out of the shower is luxurious and convenient. Being able to move that towel warmer from room to room and from home to home ups the convenience factor. But now, you can experience convenience at its best when you purchase the freestanding, upscale Barcelona electric towel warmer bundled with Belkin's Wi-Fi-enabled WeMo Switch. This combination brings luxury and the utmost convenience under the same umbrella by allowing you to operate your towel warmer from anywhere using a mobile device.

With eight bars and a stainless-steel finish, the stylish plug-in Barcelona towel warmer pairs with the WeMo Switch to offer convenience like you've never experienced it before. To bring this technology to life, you simply have to plug your towel warmer into the WeMo Switch, plug the switch into an outlet, and download the free WeMo app from the Google Play Store or the Apple App store.

"Smart" Controls

Adding yet another level of convenience, the WeMo Switch works with the IFTTT (if this then that) service, which allows you to turn your towel warmer on or off when prompted by another event or activity. For instance, the WeMo Switch can be programmed to turn the towel warmer on when the sun rises or turn the towel warmer off when people leave the house, when used in conjunction with other WeMo products.
