

Ember

Mirror

In today's society, function trumps all. So when it comes time to purchase a new mirror for a bathroom, living room or any other room in your home, why not add some functionality to it?

WarmlyYours offers the 2.9- by 2-foot Ember Mirror radiant panel, which looks just like an ordinary mirror. Yet, looks can be deceiving. This mirror emits 600 watts of heat so that it can heat a room or even function as a heating source/mirror defogger in bathrooms. The panel can even reduce the amount of energy you use and, therefore, the amount of money you spend to heat your home.

Furthermore, mount it vertically in your bathroom, accessorize it with a few towel bars (available for an additional cost), and you have a beautiful, fully functional towel warmer. Or, deliver warmth to your room from above by adding our ceiling mounting kit to your purchase.

Imagine the opportunities!

Specifications

Name	SKU	Length x Width	Volts	Watts
Ember Mirror (Plug-in)	IP-EM-GLS-MIR-0600	35" x 24"	120	600
