

Snow and Ice Melting Timer Control

The WarmlyYours SCM-DUAL Snow and Ice Melting Timer Control is a simple, affordable option for snow melting, slab heating, and roof and gutter deicing systems. At 120V operational voltage, this unit features a 12-hour, adjustable timer and a NEMA 1 enclosure with hinged cover. The operation of this control couldn't be easier as the user can simply turn the timer to their desired heating duration. It includes a 2-pole relay and terminal block for easy wiring. For projects with a smaller amperage draw (20 Amps for 120V or 10 Amps for 240 - 277V), the SCM-DUAL can be used without a relay panel. However, for projects with larger amperage draws, the controller must be used with a compatible relay panel. Using a relay panel, sold separately, allows control of larger jobs and can help switch voltages ranging from 120V to 277V.

Product Information

- ✓ **NEMA 1 enclosure with hinged cover**
- ✓ **Timer adjustable up to 12 hours**
- ✓ **Simple and affordable**
- ✓ **Reliable, manual control**
- ✓ **Maximum Load (Resistive Only): 20 Amp, 120 VAC, 50/60 Hz; 10 Amp, 240 VAC, 50/60 Hz; 10 Amp, 277 VAC, 50/60 Hz**
- ✓ **Can be used with relay panels (for larger projects)**
- ✓ **Terminal block for easy wiring**
- ✓ **May be used for snow melting and roof deicing**
- ✓ **Front door easy lock clasp operates using a coin or large screwdriver.**

Specifications

Area of use	Nonhazardous locations
Protection	NEMA 1
Mounting	Wall mount

Limited Warranty

WarmlyYours' two year limited warranty covering defects in workmanship and materials applies.
