

WarmlyYours Introduces *NEW* TempZone ValueMats™

WarmlyYours now offers **TempZone ValueMats™** as an economical floor heating solution. ValueMats™ utilize the same industry leading technology as TempZone™ rolls, but are designed to warm just the most utilized areas in a bathroom (value coverage) to stay within your budget.

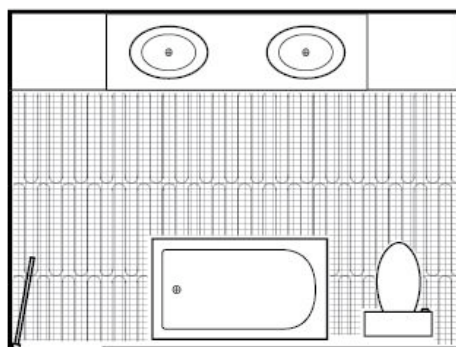

Here's what you need to do when considering the value coverage option:

1. Review your quote and consider the full coverage option as it is quoted.
2. Ask yourself if the heated areas give you the exact coverage you desire.
3. Determine whether the quote is within your budget.

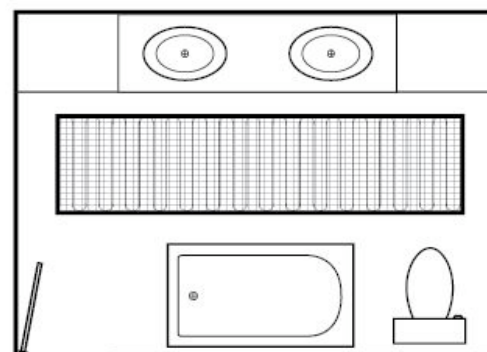

If you like the amount of coverage and it fits your budget, simply place your order. If you would like to decrease your coverage to meet your budgeted amount, it's not a problem. Just give us a call to design your value coverage.

Keep the following in mind when considering the value coverage option:

1. **Full Coverage** - provides every available inch of your room's footprint with floor heating so that it will be like a blanket of warmth under your feet, no matter where you step.
2. **Value Coverage** - reduces coverage to just the most utilized areas like the "standing area" in front of the vanity and provides the luxury of floor heating while staying in your budget.
