Imagine an office that is patient-centered, cosmetically oriented, and welcoming.

Considering the common fear in society, a dentist office is most likely the last place that would come to mind, but at Lincoln Park Smiles, all fear is eased by comfort and hospitality.

Located in Chicago, Illinois, Lincoln Park Smiles is a state-of-the-art facility that provides amiable atmosphere and helps you create your perfect smile. With 24-

hour emergency service, Lincoln Park Smiles is dedicated to ensure that their patients have a healthy and welcoming experience.

Unfortunately, Chicago's winter climate can be threatening and dangerous outside Lincoln Park Smiles, making it difficult to ensure safety and comfort for their customers. With the accumulation of snow and ice on the walkway outside the building, it becomes risky for those entering or leaving the office. This in mind, Dr. Jack Manikowski of Lincoln

### **ART: Adaptive Radiant Technology**

Based on the principle of the warm heat from the sun, radiant heat is a sustainable, adaptive, and healthy heat that is absorbed and is not prone to heat loss or overheating. A Harvard University Study confirmed that physical warmth, caused by radiant heating, directly affects and improves emotional well being, while influencing positive behavior.

Not only does radiant heating improve emotional health, but it also increases energy efficiency. With the use of radiant heat as a primary heating source, temperature levels can be maintained, on an average of 5.6% lower than any other form of heating. That means, for every degree you lower your thermostat, you can save 5% off your current heating bill. That's 25-30% in annual savings.

Park Smiles, had WarmlyYours team with JM Industries to install WarmlyYours snow melting system.

With the help of Mark Boyer from JM Industries, WarmlyYours automatic snow-melt cable system was placed under the outdoor tile landing and steps, in order to eliminate snow and ice. Designed to install directly in concrete, asphalt, or in mortar beneath pavers, our snow melting system ensures that the walkway and steps of Lincoln Park Smiles are completely clear of snow and ice to guarantee safety.

After installing the snow melting system, Mark shares his experience working with WarmlyYours,

“Installing WarmlyYours products are always a dream! It is always easy to install and the customer support at WarmlyYours is fantastic. Chad Braker is very helpful and great to work with. All in all, WarmlyYours is just awesome!”

With Mark’s easy-going attitude and hard working hands, the installation of the snow melting system was a breeze. Not only did WarmlyYours and JM industries share an easy and enjoyable experience with this project, but also Lincoln Park Smiles now has the assurance of customer safety and warmth all winter long.

WarmlyYours SmartPlan™ for Lincoln Park Smiles' Outdoor Landing

## About WarmlyYours Radiant Heating Inc.

### Trusted Experience • Steadfast Innovation

With trusted industry experience, 12+ years of business, WarmlyYours, located in USA and Canada, offers the industry’s most innovative energy-efficient and maintenance-free electric radiant heating solutions for virtually any flooring surface and radiant heat solutions for any room. We offer the hottest floor-heating mat on the market, with a fully heated mat that utilizes a full 15-watt per square foot.

### We’re More than Floor Heating...

The only company to feature a full collection of radiant products, from our core product - floor heating, snow melting, towel warmers, and our newest “Best of Show” KBIS 2011 award-winning product, LAVA infrared glass heating panels, WarmlyYours offers a product that fits you or your client’s needs and style.
